Required Immunizations: **To be completed by health care provider. Documentation must be in English.**

Measles/Mumps/Rubella: Two doses required (at least 28 days apart after 12 months of age) or titer with report attached.

Dose 1 ____/____/____

Dose 2 ____/____/____

OR

Positive Titer
□ Measles ___/___/___
□ Mumps ___/___/___
□Rubella ___/___/___
****Attach report**

Polio: Primary series in childhood with IPV alone, OPV alone, or IPV/OPV sequentially

Completed Primary Series ____/____/____

Hepatitis B: Three doses of vaccine or two doses of adult vaccine in adolescents 11-15 years of age, or a positive hepatitis B titer

Dose 1 ____/____/____ Dose 2 ____/____/____ Dose 3 ____/____/____

OR

Hepatitis B Titer ____/____/____ ****Attach report**

Tdap (Tetanus, Diphtheria, Pertussis) or booster with **Td** in last 10 years

Tdap ____/____/____ **OR** Td booster ____/____/____

Meningococcal: **Required** at college entry for students living in campus housing or **must** have signed the enclosed waiver that will be kept on file in your student health record.

If initial dose given age 13-15 yrs: booster dose at 16-18 yrs of age required
If initial dose given age ≥16 yrs, no booster dose required

Vaccine Date ____/____/____

Booster (if indicated) ____/____/____

OR

☐ Waiver completed

Varicella: Birth in the U.S. before 1980, a history of chicken pox, a positive varicella titer, or two doses of vaccine meets requirement

1. History of Disease ☐Yes ☐ No **OR** Birth in U.S. before 1980 ☐ Yes ☐ No
2. Immunization
   Dose 1 ____/____/____

   Dose 2 ____/____/____
   (given at least 12 weeks after 1st dose ages 1-12 and at least 4 weeks after 1st dose if age 13 or older)
3. Positive Titer ____/____/____ **Attach report

Recommended but not required vaccines:

Influenza: annual immunization
HPV: series of three vaccines for females and males 11-26 years of age

Part I. Tuberculosis (TB) Risk Assessment – Required of all students entering Wilson College, based upon guidelines of the American College Health Association and the U.S. Centers for Disease Control. For more information, see www.acha.org or www.cdc.gov/tb.

1. Has the student ever had a positive tuberculin skin test (TST) or Quantiferon TB test? ☐Yes ☐No

2. Does the student have a medical condition associated with increased risk of progressing to TB disease? ☐Yes ☐No

3. Is the student a member of a high risk group? ☐Yes ☐No
   - Had close contact with a known case of active tuberculosis
   - Use of illegal injected drugs
   - Immunosuppressed by medication or disease
   - Resident, employee, or volunteer in a nursing home, homeless shelter, correctional facility, or other health care facility

4. Has the student lived in one of the countries listed below and arrived in the U.S. within the past 5 years? ☐Yes ☐No

Afghanistan
Algeria
Angola
Argentina
Armenia
Azerbaijan
Bahrain
Bangladesh
Belarus
Belize
Benin

Student's Name_______________________________________ Date of Birth_______________________

Part II. Tuberculosis Screening – date of screening must be within past 6 months

Clinicians should review and verify the information in Part I. Persons answering YES to any of the questions in Part I are candidates for either Mantoux tuberculin skin test (TST) or Interferon Gamma Release Assay (IGRA), unless a previous positive test has been documented.

1. **Does the student have signs or symptoms of active tuberculosis disease?** ☐Yes ☐No
   - *Unexplained elevation of temperature for more than one week, weight loss, night sweats, persistent cough for more than 3 weeks*
   - *Cough with production of bloody sputum (hemoptysis)*

If NO, proceed to tuberculosis testing. If YES, proceed with additional evaluation to exclude active tuberculosis disease, including tuberculosis testing, chest x-ray, and sputum evaluation, as indicated.

Tuberculosis Testing

Tuberculin Skin Test (TST): *TST results should be recorded as actual millimeters (mm) of induration; if no induration, write "0".*

Date placed ____/____/____ Date read ____/____/____ Results: _______mm ☐positive ☐negative

Quantiferon Test (QFT): I*f previously received BCG vaccine, a blood test such as Quantiferon Gold or T-spot is the preferred test to indicate absence of TB.*

Date obtained ____/____/____ Results: ☐positive ☐negative ☐indeterminate

If a current or previous TST or QFT is positive, a chest x-ray is required. ***A copy must be provided in English.***

Date obtained ____/____/____ Results: ☐normal ☐abnormal

INH Treatment: Date Started __________x__________ months or ☐declined

Meningitis Information

College students living in campus housing are at an increased risk for meningococcal disease due to the close living quarters. Pennsylvania law **requires** that all incoming residential students must receive the meningitis vaccine or complete and sign a waiver declining the vaccine.

What is meningococcal disease?
Meningitis is a rare but dangerous and fatal bacterial infection. Even if treated quickly, the infection can cause death or permanent complications such as hearing loss, brain damage, and amputations.

How is it spread?
The bacteria are spread through respiratory and throat secretions of an infected person (e.g. kissing). It is not spread by casual contact and usually is not as contagious as the common cold.

What are the symptoms?
Early symptoms usually include sudden onset of fever, severe headache, and neck stiffness. Symptoms also can include nausea, vomiting, sensitivity to light and confusion. Symptoms usually appear 3-7 days after exposure. If you think you have these symptoms, call your doctor immediately.

Can meningitis be prevented?
Yes. Keeping vaccinations up to date is the best prevention of meningitis. A vaccine called Menactra protects against 4 out of 5 types of the disease. As with any vaccine, it is not 100% effective. If you have received the vaccine and think you may be experiencing the symptoms, call you doctor immediately.

For more information about meningococcal disease and the vaccine, visit www.cdc.gov/meningitis/index.html

---

Please check the statement that applies, sign, and return with your student health information form.

☐ I have received the meningitis vaccine on: Date ____/____/____

☐ I have read and understand the information about meningitis and I **DECLINE** the meningitis vaccine due to strong moral or religious conviction.

Signature of Student ____ **Date:** _________________
(Signature of Parent/Guardian if student under 18 years of age)

☐ My physician has recommended that I do not receive the vaccine due to (**reasoning must be documented by physician**):

As a requirement of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), Wilson College is required to monitor a complete list of hypersensitive individuals that have clinically documented allergies to agents used for control of insects, rodents, and fungus in all areas of Wilson College. If you are a WWC participant and have a child with documented allergies to pesticides, please use this form to provide that information as well.

In addition, all such individuals must be notified prior to and before conducting spraying or application operations in that defined area.

If you indicate sensitivity, this form will be shared with the Director of Facilities Management and the Environmental Compliance Coordinator to ensure that you are contacted prior to a spraying or application.

FIFRA – WILSON COLLEGE PESTICIDE HYPERSENSITIVITY REGISTRY INDIVIDUAL SURVEY

Name: ____

E-mail:____

Phone number:____

Are you hypersensitive to any pesticides, fungicides or rodenticides?

Yes_________ No _________

If so, what are you hypersensitive to?

____

Is this hypersensitivity clinically documented?

Yes_________ No _________

If Yes, please provide your medical documentation.
